

Mo Zaic is riding his bike to meet friends after school. He completed the ABC check and filled his basket with safety items. Place checkmarks next to each item to solve the puzzle. Each item needs its own checkmark next to it, above it, or below it, but not diagonally. The numbers tell you how many checkmarks are in each row or column. There can't be two checkmarks next to each other, even diagonally. Read the letters that get covered to find your answer.

Enter the answer for the clue location. Go there to get the clue for this region's meta-puzzle. When available, always ride in the bike lane in the direction of traffic and pay attention to where you're going.
