

# Summer Puzzle Hunt

4

Fill in each square with the numbers 1-6. Use each number once in each row and column. The small numbers in the upper left corner of each "block" (region with heavy lines) is your "target" number. The symbol is which operation to use in that block. Place the numbers in the matching colored spots below as digits. Solve the math equations. Convert the numbers to letters, using the cipher A=1, B=2...Z=26. This will take you to your surprise.
