

# Palo Alto Puzzle Hunt

2

Mo Zaic and his pals love to find hidden treasures in Palo Alto. To solve this puzzle, place water drops next to each bucket on the well. Each bucket needs its own water drop next to it, above it, or below it, but not diagonally. The numbers tell you how many water drops are in each row or column. There can't be two drops next to each other, even diagonally. Read the letters that get covered by water drops to get your answer. Enter your answer to get the clue location. Go there to get a clue and keep track of it for the final puzzle.

	1	1	1	1	1	2
2	R	W		E	M	I
0	H	J	F		U	
1	M	E	O	S	L	N
1	P	C	R	B	D	H
2	I		N	A	E	
1	S	T			G	I
